### **ALLOWABLE SUBJECT MATTER**

1. Claim 1 (sole claim) is allowable over the prior art of record.
2. The following is an examiner's statements of reason for allowance:

The examiner has found that the prior art of record does not appear to teach or suggest or render obvious the claimed limitations in combination with the specific added limitations as recited in independent claims and subsequent dependent claims. The prior art of record fails to teach or suggest a method for balancing server work load in a client-proxy telecommunications system having location aware communication devices comprising creating a map graph having a first layer, a second layer, a third layer and a fourth layer wherein the first layer contains cell to collection assignments, the second layer contains cell to partition assignments, the third layer contains communication requirements to partition assignments, and the fourth layer contains partition to server assignments. In addition, the prior art of record fails to teach or suggest responsive to determination that the load of the server exceeds the predefined threshold, sending an instruction to a re-mapping program, wherein the re-mapping program re-calculates the map graph using a rules engine upon receipt of the instruction, and performing communications in accordance with the re-calculated map graph, wherein the communications in accordance with the re-calculated map graph reduces the work load of an overloaded server in the system.

### **ADDITIONAL REFERENCES**

3. The examiner as of general interest cites the following references:
